**January 27, 2017**

**Dear Mr. Berman,**

**I have become aware of the NCAA Student Athlete Concussion Injury Litigation and wanted to tell you that I think this litigation is incredibly important for college athletes.**

**As a Division I field hockey player at Michigan State University I experienced a MTBI –concussion on August 19, 2008. Though I was knocked out (a 90 mile an hour line drive ball hit on the forehead will do that), I was just given a bag of ice on the sidelines and not hospitalized. If you would like more information about my injury, please contact me (information below). I received a diagnosis of post concussion syndrome several months later after transferring to Ohio State University with symptoms that persisted over the next several years.**

**I have given MSU permission to forward my personal contact information (letter enclosed).**

**Dr. W. Jerry Mysiw, the Chair of the Department of Physical Medicine and Rehabilitation at OSU treated me for my MTBI post concussion syndrome until the end of last year—8 years, 5 months from the date of my injury.**

**My family Doctor, Dr. Catherine Waterfield, now sees me on a continuing basis for my symptoms, which are now manageable. With help from Ohio State's Disability Services, I was able to graduate from OSU in May 2015 with a BFA degree.**

**I was hired as a Graduate Assistant at Ohio University in January 2016 and completed my Master's Degree in Sport Sciences in December 2016.**

**I have dedicated my life to the field of sports training and I am pursuing a career in Strength & Conditioning. I worked as a personal trainer and instructor at the OSU Sports and Recreation Center for 6 years and became a respected Yoga teacher for sports teams. I have developed my own sports specific Yoga movement program, which helps athletes reduce injury. I have worked with countless teams at OSU as a Strength & Conditioning intern and Ohio University in the Strength & Conditioning department where I worked specifically with football. Recently I was given the opportunity to work with the Columbus Crew professional soccer team this spring.**

**I have successfully managed my post concussion symptoms that I have through diligent hard work and support from my parents and medical doctors. My knowledge in this area makes me a better strength and conditioning coach.**

**I hope this information helps you with your case.**

**Sincerely,**

RE: Subpoena, In re National Collegiate Athletic Association Student-Athlete  
Concussion Injury Litigation, United States District Court Case No. MDL 2492

Dear Mr. Kent,

You have permission to disclose my contact information, first year attended and the NCAA sport I played that MSU has on file in addition to the updated information I am providing below.

I played field hockey for MSU in the 2008-09 season and sustained a concussion at a team pre-season scrimmage on Tuesday, August 19, 2008. I transferred to Ohio State the next semester because of post-concussion symptoms. I was diagnosed and began treatment for those symptoms by April, 2009 with Dr. W. Jerry Mysiw, the Associate Professor and Bert C. Wiley Chair for PM&R (Physical Medicine and Rehabilitation) at OSU.

Sincerely,

Kelly F. Roderick
